## Course Description

This Hands-On course is a must for your cable locating technicians. Today's congested underground environments with the massive deployment of fiber optic cables, and existing copper, Pipes, etc., there are too many uncertainties out in the field. Without the proper training, one missed locate can cost you a lot of money and major headaches.

This course can be tailored to any Utility Environment and can include any customer equipment.

Today's digital locators have pinpoint accuracy, and are superior to locators of the past. We will show you how to use these new locators and the locaters you have on-site.

Students can learn to locate and mark underground utilities (facilities) for telephone and internet providers, cabling system providers, electric services providers, natural gas providers, liquid pipeline providers, water and sanitary sewage providers, excavators, contractors and subcontractors.

Before any excavation or digging can take place... underground facilities must be located and marked... it's not only the law... it's vital to protecting our nation's critical infrastructures. This

course will cover all the techniques for locating and marking ALL types of facilities/utilities to current Industry Standards.

NOTE BTS ensures that each student will demonstrate his or her abilities according to current utility locating laws, Industry Best Practices and current Industry Standards. There is no better way to prove your skills, other than Hands-On Practical Real-World Experience.

## Students Will Learn

- Electrical Safety/Energize
- Peak and Null
- Round Fields & Path of Least Resistance
- Frequencies & Current
- Vertical Inspection of Field
- Horizontal Inspection of Field
- Changing Current Levels
- Changing Field Shape
- Endpoint
- Locator Theory
- Locator Operation
- Choosing the Right Frequency
- Locating Cables, Pipes, etc.
- and More...

## Target Audience

Anyone responsible for Underground locating in any environment.
