

Course Description

BTS offers the finest accelerated CompTIA Project+ certification training. The CompTIA Project+ exam is recognized throughout the industry and acknowledges professional competency in IT project management. The CompTIA Project+ exam focuses on critical business skills, interpersonal techniques, and project management.

As IT Professionals, you will undoubtedly be involved in technology projects within your organization. Failing to complete these projects on time, and on or under budget can have a significant financial impact on your company! The primary challenge that most teams face in achieving these objectives is a lack of knowledge in the area of project management!

By understanding the concepts and theories associated with project management, you will have the skills to lead people, to build better relationships with others and to improve your skills beyond technical knowledge.

Our CompTIA Project+ certification class will teach you to have the knowledge and experience to complete projects on time and within budget. In addition to this, the value of the CompTIA Project+ certification opens many career opportunities.

Our CompTIA Project+ certification allows you to get your CompTIA Project+ certifications in 5-days. You will acquire the necessary skills to plan and implement IT projects that will positively impact your organization. This CompTIA project+ course offers intense training from industry experts by far.
